

SQL Server Developer | Data Integration

S Srinivas Rao

ph: +91-7995398242

Gmail: svsrinivasarao2001@gmail.com

SUMMARY

Results-driven **SQL Server Developer** with **3.3 years of experience** across diverse production environments. Skilled in designing and optimizing database solutions using **MS SQL Server, T-SQL, SSIS, SSRS, Power BI, and Azure Data Services**. Adept at building ETL pipelines, developing reports, and ensuring high-performance data operations. Experienced in **Azure SQL Database, Azure Data Warehouse, and Azure Storage**, with strong knowledge of **performance tuning, troubleshooting, and automation using PowerShell**. Proven ability to deliver scalable data solutions, resolve critical incidents, and support enterprise-level analytics with clear documentation and effective communication.

Functional skills summary

- Mastered **T-SQL DDL/DML** for schema design and complex data operations.
- Designed, optimized, and maintained **Stored Procedures, Views, and User Defined Functions**.
- Applied performance tuning techniques including **query optimization, indexing strategies, and fragmentation analysis**.
- Troubleshot **blocking, deadlocks, and disk space issues**, ensuring high database availability.
- Performed **database restores** across production, test, and development environments.
- Managed **user roles, permissions, and security policies** to enforce compliance.
- Created, scheduled, and troubleshot **SQL Server Agent jobs** for automation.
- Leveraged DBCC commands and **DMVs for proactive diagnostics and monitoring**.
- Developed **SSIS ETL packages** to integrate data into enterprise data warehouses.
- Implemented advanced **Data Flow transformations (Lookup, Merge, Slowly Changing Dimension, Derived Column)**.
- Built and deployed **SSRS reports** to deliver actionable insights to business stakeholders.
- Utilized **Performance Monitor and SQL Profiler** for query and workload tuning.
- Integrated **Power BI dashboards** with SQL Server and Azure datasets.
- Applied **XML data types** in stored procedures for flexible parameter handling.
- Automated **ETL pipelines using Azure Data Factory (ADF)**.
- Delivered **Azure SQL Data Warehouse and Azure Storage** solutions for scalable analytics.
- Administered **Azure SQL Database for cloud-native workloads**.
- Automated DBA tasks with **PowerShell scripts and dbatools** for patching, backups, and migrations.
- Applied **Dynamic SQL, error handling, and transaction control (TCL)** for robust application logic.
- Provided **24x7 on-call support**, ensuring business continuity and rapid incident resolution.

Education

Completed BTech from JNTUK University, Andhra Pradesh, India.

EMPLOYMENT HISTORY

1.ZENSAR, Noida

from March 2023 to till date

Technical Skills

SQL Server Versions	MS SQL Server 2025,2022,2019,2017,2014,2012, Azure SQL Database
Tools	Service now, Remedy, Lite speed, HP Service Manager, Tivoli
Databases	SQL Server, MYSQL
Operating System	Windows Server 2012,2016,2019,2022, 2025
Skills	T-SQL Programming, SSIS, SSRS and Visual Studio,ADF

PROFESSIONAL EXPERIENCE

1.ZENSAR, Noida

from March 2023 to till date

Client: **TELUS HEALTHCARE, USA**

TELUS Health is a division of Canadian multinational Telus Corporation, a company that has grown over three decades to lead the charge in telecommunications, agriculture, security, and health sciences. TELUS Health has long worked to achieve considerable social good with its corporate activities, recently helping two million Canadians gain access to their own digital health records and opening a mental health clinic in Montreal to better support the community.

Environment: SQL Server 2025, 2022,2019,2017,2014and Azure Managed instance

Responsibilities: -

- Coordinating the Developing activities with the development team And QA team.
- Analyzing the requirements and discussed with managers and leads on Functionality.
- Developed SQL joins based on different conditions in order to meet requirements.
- Created Views on multiple tables in a database.
- Written complex stored procedures, functions and Triggers.
- Used Table variables inside functions and stored procedures.
- Participate in discussions involving the application creation and understand the requirements and provide the back-end functionality for the applications
- Performed data import and data transformation activities.
- Designed and automated ETL pipelines to integrate data from SQL Server, Azure SQL Database, and Azure Storage into enterprise data warehouses.
- Implemented Data Flow transformations (Lookup, Merge, Derived Column, Slowly Changing Dimension) for complex data processing.

- Scheduled and monitored pipeline runs, ensuring high availability and timely delivery of data.
- Applied error handling, logging, and performance tuning to optimize pipeline execution.
- Developed and published interactive dashboards and reports for business stakeholders.
- Integrated Power BI with SQL Server and Azure datasets to deliver real-time analytics.
- Applied DAX calculations and measures to enhance reporting accuracy and flexibility.
- Managed data refresh schedules, security roles, and workspace governance for enterprise reporting.
- Create functions to provide custom functionality as per the requirements.
- Its 24x7 model support contains On call support as well.
- Daily checking and resolving the tickets depends on the priority levels.
- Responsible for performing Database Maintenance activities like rebuilding/reorganizing indexes update statistics, checking database integrity and clean up history on regular intervals.
- Working on blockings and disk space issues and query slowness issues.

- **Personal Details**
- Date of Birth : 24-05-2001

(SRINIVASA RAO)
